

SALEAI

Chatbot for Recommendation System in Laptop Store

What is SaleAl?

"Chatbot that providing laptop recommendations"

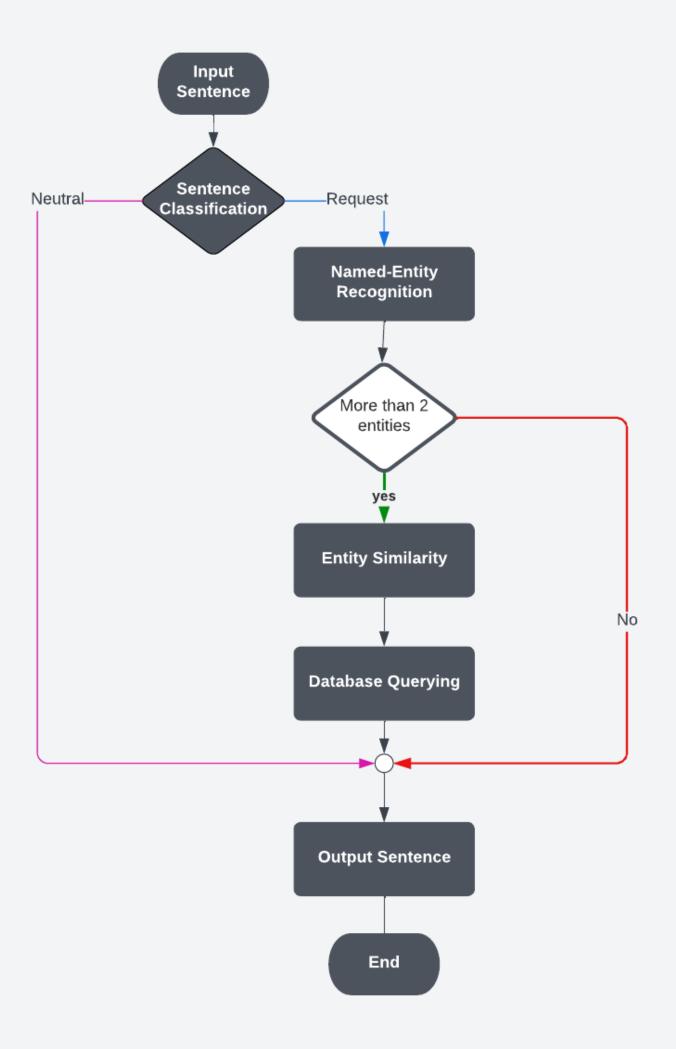

User

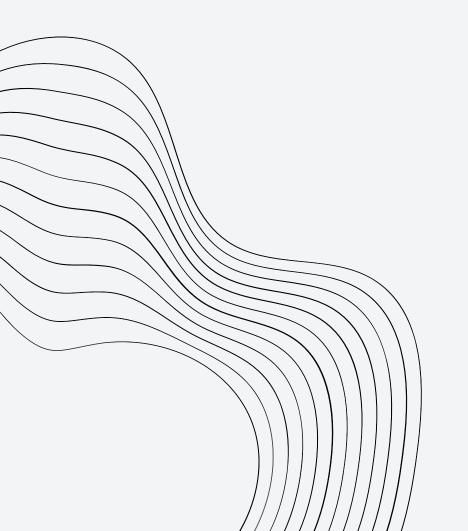

อยากได้โน๊ตบุ๊คยี่ห้อ ASUS ราคาไม่เกิน 20000 บาท

SaleAl

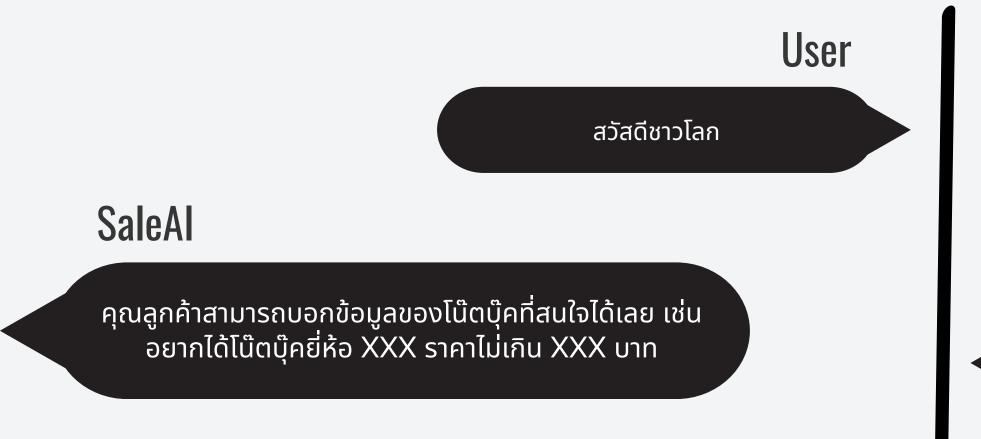

ขอแนะนำ ASUS vivobook Ram4GB memory 512GB ราคา 16000 บาท

System Overview

Neutral Sentence

Request Sentence

SaleAl

User อยากได้โน๊ตบุ๊คยี่ห้อ ASUS รุ่น VIVOBOOK ราคาไม่เกิน 20000 บาท

ขอแนะนำ ASUS vivobook Ram4GB memory 512GB ราคา 16000 บาท

Model Building

LSTM model -> Recurrent Nueral Network concept

BERT model -> Transformer concept

BERT base multilingual

DistilBERT

WangChanBERTa

Dataset: Custom dataset consist of user sentences and class label

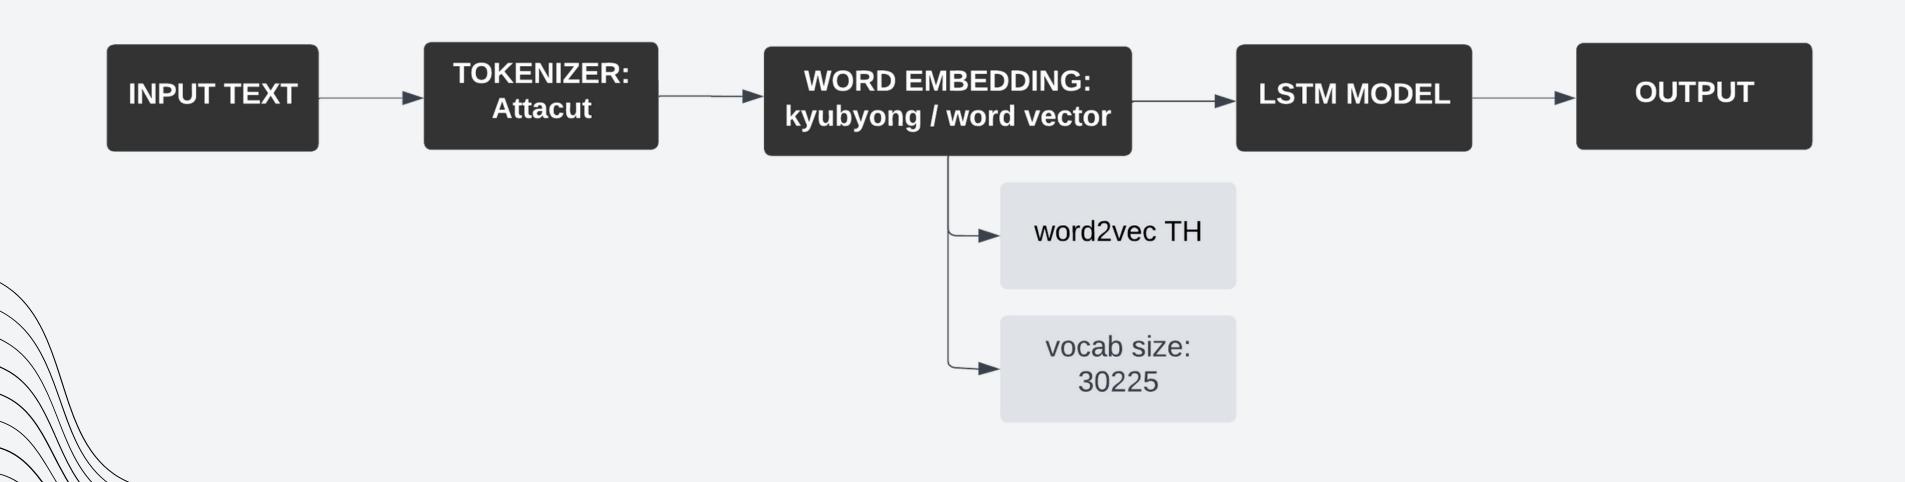

350 instances of Neutral class

300 instances of Request class

Train:Validation:Test = 60:20:20

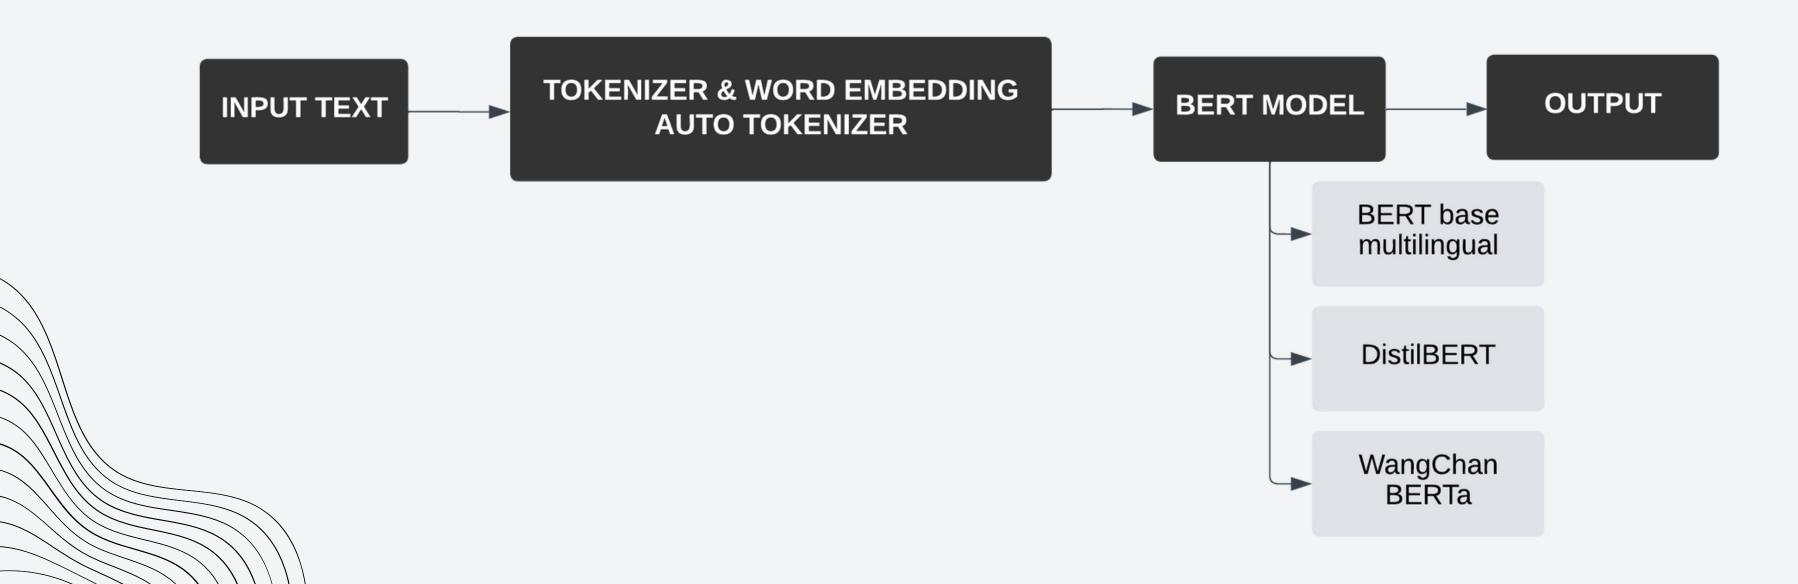

ldx	Sentences	Label
1	สวัสดีชาวโลก	Neutral
2	วันนี้กินอะไรดี	Neutral
3	อยากได้โน๊ตบุ๊คยี่ห้อ ASUS ราคาไม่เกิน 20000 บาท	Request
4	ขอชื่อรุ่นโน๊ตบุ๊ค MSI ที่มี RAM 32 GB หน่อยครับ	Request

LSTM model

BERT model

Using API from Hugging face to call tokenizer of each pre-train model and downstream task

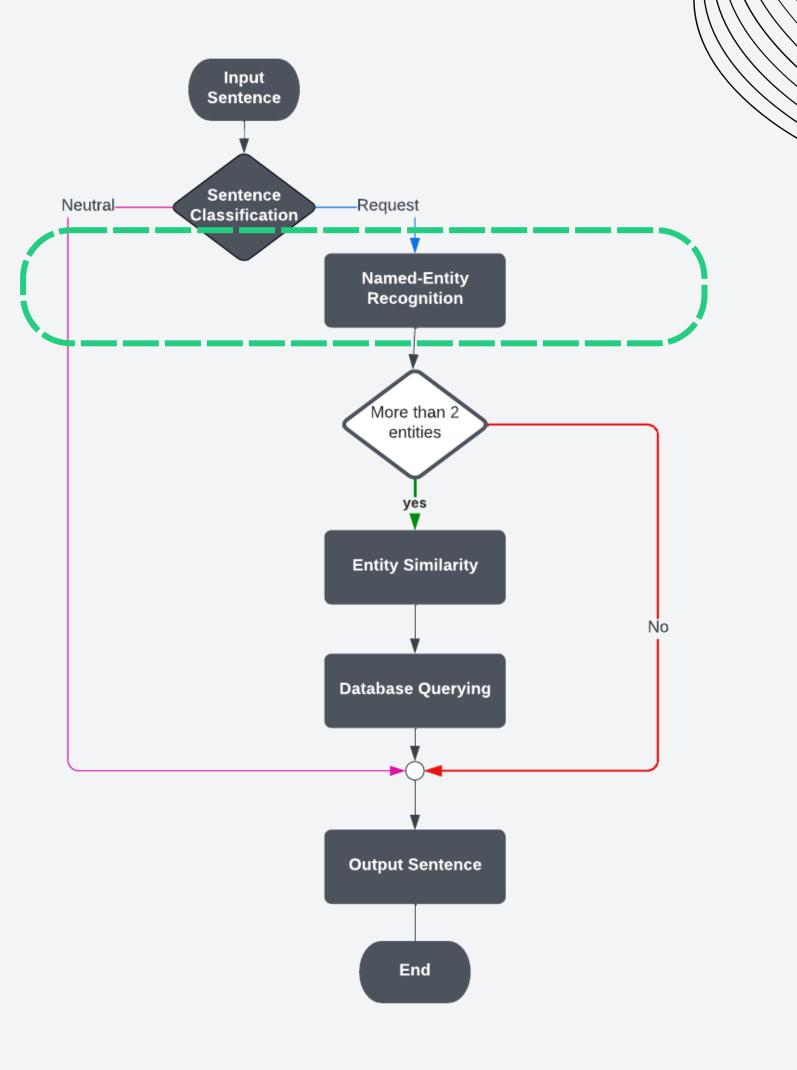

Result

	Data Set	Metrics						
Model		Accuracy	Precision		Recall		F1 score	
			Request	Neutral	Request	Neutral	Request	Neutral
LSTM	Train	47%	44%	51%	63%	33%	52%	40%
	Test	63%	57%	79%	87%	43%	68%	56%
BERT base multilingual	Train	97%	96%	98%	98%	97%	97%	97%
	Test	84%	80%	88%	87%	81%	83%	84%
DistilBERT	Train	78%	98%	71%	54%	99%	70%	83%
	Test	71%	82%	67%	47%	91%	60%	77%
WangChang BERTa	Train	94%	97%	91%	89%	98%	93%	94%
	Test	91%	93%	89%	87%	94%	90%	92%

REQUEST(USER)

CALL HF API

QUERY DATABASE

RESPOND

Database querying

CONCLUSION

Conclusion

Already done

- Classify sentence type with WangchangBerta (request/neutral)
- Extract Entities from sentence
- Match entities to database attribute for queries
- Create chatbot in Discord

Limitation

- Discord time out
- Entities relation understanding
- Support only English entities
- Only correct spelling and grammar

THANK YOU
